

***The Complete Inspection Management Solution
Using Mobile Application Technology***

Agenda

- Problems of the Present Systems
- HBI Solves the Problem
- Administrator Walkthrough
- Inspector Walkthrough

Problems of the Present Systems

- Inspectors **waste time** and **cost** doing “backroom” paperwork
- Administrators **cannot efficiently manage** and **schedule** inspection resources
- Building Managers **have difficulty retrieving** inspections information to control risks of O/M activities
- **Difficult** to **access** past inspection information for government or insurance

Report

Problems Hinder Building Continuity of Care

Continuity of Care Defined: The management of buildings so as to maintain a low health risk to inhabitants.

Cloud Based Mobile Applications Promote Continuity of Care

- Fosters teamwork of administrators, inspectors, building managers
- Reduces inspection time and costs
- Facilitates risk management

How HBI Promotes Building Continuity of Care

Inspector

- Eliminates wasted "backroom " effort preparing or recording inspection reports
- Eliminates rerecording duplicate information from past inspections

Administrator

- Provides an efficient way to schedule inspections and assign inspectors
- Effortless retrieval of past inspection information

Building Manager

- Allows manager to search for hazards found in past inspections
- Allows managers to easily record risk mitigation precautions
